

CONATHANE® EN-9

CONATHANE EN-9 is a two-component, non-MBOCA, high-strength liquid polyurethane potting and molding system designed to ensure the performance of electrical/electronic assemblies exposed to severe environmental extremes. Elastomers prepared from CONATHANE EN-9 exhibit the following outstanding properties:

- Superior Hydrolytic Stability
- Good Handling Properties
- Thermal Shock Resistance (-70°C To 135°C)
- Non-MBOCA Curing System
- High Dielectric Strength (>700 Vpm)
- Low Dielectric Constant
- Low Viscosity
- Low Dissipation Factor
- Fungus Resistance

CONATHANE EN-9 is highly recommended for cable and connector potting and molding - both military and commercial - for water-tight electrical connectors, harness breakouts, and cables. Other applications include potting and encapsulation of modules, wire wound devices, and strain sensitive components as well as 100% solids and solvent-based coatings for printed circuitry and components.

The dielectric properties of CONATHANE EN-9 are excellent; the dielectric constant and dissipation factor are exceptionally low and remain relatively unchanged over the recommended operating temperature range of -70°C to 130°C.

CONATHANE EN-9 cures to a nominal Shore A Hardness of 85 and has an application life of about 2 hours. It is available in translucent amber or black in pre-weighed, two-component units.

NOTE: CONATHANE EN-4 Part A may crystallize upon storage or during shipment. If this has occurred, heat to 60°C, mix thoroughly and cool to room temperature before processing.

of mercury and pour into molds at 25°C-100°C. Containers should be large enough to allow for volume expansion during the degassing cycle. Any material or container that could introduce moisture into the system should be avoided.

Mix CONATHANE EN-4 Part A and CONATHANE EN-9 Part B together thoroughly at 25°C-60°C using metal, plastic, or glass stirrers and containers. Degas the mixed material at 1-5mm

SPECIAL NOTICE

Due to the excellent solubility of this liquid system in solvents such as methyl ethyl ketone (MEK), xylene, toluene, and various blends of these solvents, this system also shows promise as a flexible conformal coating for printed circuitry and components. Initial laboratory evaluations have shown excellent dipping and spraying qualities when diluted 40%-60% with a 50/50 blend of MEK/toluene.

STORAGE AND HANDLING

The shelf life of CONATHANE EN-4 Part A and CONATHANE EN-9 Part B is 15 months from date of manufacture in the original, unopened containers when stored at 70°F-85°F. If containers are opened and the contents only partially used, containers should be flushed with dry nitrogen (see CONAP® Dri-Purge) before resealing to prevent waste of material.

CAUTION: Avoid contact with the resin and hardener. The use of protective clothing is recommended. Should contact occur, wash with mild soap and water. Use only in well-ventilated areas and avoid prolonged or repeated breathing of fumes. Curing ovens should be vented to the atmosphere.

COLORING

CONATHANE EN-4 Part A mixed with CONATHANE EN-9 Part B cures to a translucent amber. CONAP® color concentrates can be added to make color variations. (see CONAP® DS-1830 bulletin AC-102)

AVAILABILITY

CONATHANE EN-9 is available in two-component (CONATHANE EN-4 Part A and CONATHANE EN-9 Part B) gallon, 5-gallon, and 55-gallon units. An EVALUATION KIT of EN-9 is available at a nominal cost.

CAUTION

Responsible handling of Cytec products requires a thorough preview of safety, health, and environmental issues prior to use. Review the Material Safety Data Sheet(s) for the specific Cytec product(s) and container label information before opening containers. Ensure that employee exposure issues are understood, communicated to all workers, and controls are in place to prevent exposures above Permissible Exposure Limits (P.E.L.'s). Review safety and environmental issues to be certain controls are in place to prevent injury to employees, the community, or the environment, and ensure compliance with all applicable Federal, State, and Local laws and regulations. For assistance in this review process, please call your Cytec representative or our office noted below.
