Glass Cleaner

1625

Maintenance cleaners clean oil and contaminants off of metal parts, printed circuit boards, barcode instruments, switch boxes, gear boxes, and engines.

Techspray has produced Blue Shower maintenance cleaners for over 30 years, making Blue Shower a staple in maintenance departments all over the world!

Contact cleaners remove oxidation, oil, and other contaminants off of contacts, metal switches, motors, relays, generators, edge connectors, buss bars, circuit breakers, scales and sensors. Contact cleaners are used in electrical maintenance and to repair faulty contacts by removing insulative contamination.

Techspray offers a variety of solvents and waterbased cleaners that allow customers to match the right products with their cleaning needs. Choosing a strong, high quality cleaner saves time and money. Grease and oil flow right off, reducing the time and materials needed to scrub off stubborn soils.

Instructions

Spray surface to be cleaned, and wipe in circular motion. Use lint-free wipe (we recommend Techspray 2365-50 or 2365-300 wipes). Not intended for sensitive non-glare coatings or touch screens. Cleaner may discolor or otherwise harm coating after repeated use. Paper towels and other low quality wipes contain surfactants and other extractibles, so may lead to streaking.
